

Simple Solutions to Empty Container Disposal

Instapak® Container Return Program

Sealed Air has implemented a return program for each of our Instapak® Containers

Instapak® 15 Gallon Containers

The return and recycling of Instapak® 15 gallon containers is made easy with the use of a Sealed Air® recycling kit. The kit consists of shipping cartons and pre-paid shipping labels. Sealed Air has arranged for these empty containers to be picked up by FedEx Ground and re-processed for use in recycled plastic products.

Instapak® 55 Gallon Drums

Sealed Air has arranged for empty Instapak® 55 gallon drum recycling through a network of drum recyclers. Because arrangements vary by region, you should begin the drum return process by simply contacting your local Sealed Air customer service location. The drums are shipped to a facility where they will be cleaned and reconditioned. If it is determined that the drum cannot be reused, it will be cleaned, crushed and recycled into another steel product.

Instapak® 275 Gallon Bulk Containers

In cooperation with the original manufacturer, Schütz Industrial Packaging, Sealed Air has joined in a program to recycle our empty Instapak® 275 gallon bulk containers. Simply call the Schütz toll-free number, 1-888-724-8389 for free pickup of the empty container. The container will be disassembled and each of the components will be recycled into other useful products.

For More Information

For more information on container return, call your local Sealed Air customer service location.
