SUPERIOR PROTECTION

A dynamic packaging product that uses a strong, highly-resilient low-slip film to surround your products, protecting them from shock and vibration, Korrvu[®] packaging showcases your product's appearance and enhances your brand. The transparent film enables your package to serve as both a protective shipper and an effective display merchandiser.

Korrvu[®] anti-corrosion packaging with Intercept Technology[™] reacts and bonds with corrosive gases, creating a neutralized atmosphere that protects your product without off-gassing.

SAVE TIME OVER TRADITIONAL METHODS

Traditional oil-based methods require an array of materials, five or six steps and up to 25 minutes to complete. The one-step Korrvu[®] with Intercept Technology[™] method requires zero additional materials and takes a few seconds to secure and protect your product.

KEY FEATURES AND BENEFITS

- Long term, contamination free corrosion protection
- Permanent, humidity independent ESD protection
- No volatiles – does not outgas
- Safe for all metals
- No chemicals, safe for handlers
- Prevents mold and mildew
- Reduces rejections – keeps items pristine
- Qualified for 15 year storage life by European automotive association/companies

GREEN AND CLEAN

- Can be recycled in corrugated streams or reused
- No chemicals or vapors. No separate application areas or special equipment. No need for handling or disposing of hazardous cleaning solvents and chemicals.
- Leaves no contaminants or deposits
- REACH / RoHS compliant
