Innovative Options

Korrvu® Hybrid™ Packaging from Sealed Air

Introducing Korrvu® Hybrid™ packaging from Sealed Air, the next evolution in the unique Korrvu® packaging family. The new design combines the benefits of both suspension and retention packaging into one new hybrid design.

Korrvu® Hybrid™ packaging suspends the product away from potential impact areas, like Korrvu® suspension packaging, while securing the product

firmly in place, like a Korrvu® retention package. Additionally, the Korrvu® Hybrid™ package requires less assembly and provides compelling cost savings.

Korrvu® Packaging and the Environment

As with all Korrvu® designs, the hybrid package provides an opportunity for source reduction, is curbside recyclable and contains more than 30% recovered paper, making it easy for customers to be environmentally responsible. In addition, the packaging stores flat to reduce transportation and storage requirements.

How It Works

The secret to the strength of the Korrvu® Hybrid™ package is its one-piece design and construction. Shipped flat, the package “pops up” to create a rigid frame with two layers of elastomeric film.

When the side flaps of the frame are folded up, the top layer of film is loosened, allowing the packager to insert the product. When the flaps are folded down, the film tightens around the product, suspending it securely in place.

The Perfect Fit

Korrvu® Hybrid™ Packaging Applications

Korrvu® Hybrid™ packaging works especially well with low-profile items that can benefit from surface protection as well as a retention-type hold. Korrvu® Hybrid™ packaging is also ideal for products that would benefit from an enhanced pack presentation.

Possible applications include:

- Cell phones
- Small electronics (MP3 players, PDAs, camcorders, etc.)
- Printed circuit boards and other electronic components

Korrvu® Hybrid™ packaging is available in a standard #10 size. Sealed Air can also create custom sizes to fit specific applications. Ask your Sealed Air representative for more information!

Product/Description	Assembled Size	Suggested Uses
Standard 10	12" x 10" x 5"	Hard drives, small circuit boards, cell phones, cameras, meters and gauges, handheld computers
